

Take Advantage of Fast, Reliable, and Cost-Effective Broadband Communications in 2008

CityLink Has Arrived in Your Neighbourhood!

Since 1995, we have been expanding our network which now reaches you along with many other organisations in Auckland, Wellington, and Christchurch. Connection is easy via a standard Ethernet port or direct fibre.

"CityLink is the fastest, most reliable and most cost-effective network available... It's the best solution"

Ron Van Twuiver, Network Pro

You Get Access to Service Providers and Users of Your Choice

Because the CityLink network is 'neutral', we offer open access to a fast-growing community of service providers and users in a wide variety of business sectors. You have control because on our network you can:

- Connect to any Internet service provider (ISP) or other IT service provider
- Exchange Internet traffic directly with any local 'peer' organisation you choose

Simpler, Faster, and More Economical than Traditional Telco Services

CityLink has a high performance pure Ethernet network that is simpler and more reliable than traditional telcos, offering services that cost you less.
