Many have asked "what is the best natural skin care available?" Zeltin's line has been voted in the top 3 best in the world, covering virtually all skin issues. Each product contains powerful antioxidants, potent vitamins and nourishing botanicals that stimulate the body's own healing powers to restore balance and produce healthy, beautiful skin.

- Gels that heal, moisturise, and protect, leaving a velvety glide
- Natural ingredients, without harmful chemicals like most products on the market

Intimate luxurious moisture gels specially formulated to protect and hydrate your skin, providing comfort in intimate sexual moments or for regular daily use. They're made with certified organic ingredients - natural, water-based, and vegan.

Joi products are free of Paraben, mineral oil, hormones, and animal cruelty. The vast majority of personal lubricants on the market have harmful chemicals and carcinogens, causing allergic reactions and other health problems. Elegant and discrete packaging makes these products suitable on your bathroom shelf or in your purse.

We hold premium French-blended natural and organic perfumes in long-lasting moisturising formulations made affordable in cute eco-friendly wooden jars. Are you looking for the best brands of organic perfume oil?

Our brand is 80% organic, diluted in natural sweet almond oil and beeswax as a healthier alternative to alcohol solvents. Our products hydrate the skin, versus drying it like most perfumes which are ethanol-based... whose fragrance usually fades within one or two hours.

Recently, our perfumes were highly recommended on Karen Philips' *Health for Women* show for their purity, effectiveness, uniqueness and high quality!

Deodorants

SEO words & phrases: natural, certified, organic, health products, healthy, personal care, deodorant

- Natural yet actually effective unlike other natural deodorants!
- *Not* anti-perspirants, allowing toxins to be released from the body

Many have thought that natural deodorants aren't effective, but Roffe has created healthy organic deodorants with natural anti-bacterial agents that are highly effective. Ingredients include natural mineral salts and baking soda, plus certified organic ingredients such as Hemp oil, Aloe Vera and essential oils.

Their deodorants are not antiperspirants, as they believe perspiration to be a natural healthy process for the body and long-term use of antiperspirants to contribute to breast cancer and other diseases. Our plastic packaging is free of EA (Estrogenic Activity), Pthalates, and Bisphenol A...a world first!

We are passionate about natural and organic health, testing products for ourselves before passing the benefits on to you

Hi, I'm Christine Gobier, director of Nature Health. *<photo here>* Our business is family-owned and operated, with a combined 20 years experience with natural and organic health products, having developed a huge knowledge of the industry.

We continue to independently research the market for the best quality natural and organic personal care products that mother nature has to offer and want to share this knowledge with our customers.

One member of our team, Bryce Sinten, is a trained sports and massage therapist and nutritional consultant.

We are not just a faceless corporate trying to promote anything for pure fiscal profit.

They have also signed the Safe Cosmetics Pact agreeing not to use known Carcinogenic or harmful ingredients.

All of Roffe's natural body care products are free of Parabens, Glycol, PEGs, and Sodium Laureth. And their vigilance extends to packaging, safeguarding a new generation against chemicals that can be harmful to child development.
